

## Danish Trolley transporter

The Trollier was designed to transport the Danish Trolley with ease, enabling it to be moved smoothly over rough ground. This allows the Danish Trolley to be used in usually less accessible areas i.e around the nursery for distributing and collecting orders for re-stocking garden centre plant areas, etc.

Quadruple Trolley transporter

Double Trolley transporter

Single Trolley transporter

*The Trollier will become an essential piece of equipment, saving time, effort, frustration and therefore money!*

There's no need to spend a fortune on smooth pathways with a Trollier.
