

Side Lifter

The Side Lifter is designed for use with variable size tractors. It is suitable for lifting trees, roses, shrubs and raspberry canes. The main frame, off set lifting basket and balancing chisel are all of robust construction to withstand arduous conditions. The lifting fingers can be adjusted to the correct agitation to suit soil conditions. It is designed for heavy lifting conditions.

The lifting bucket is offset outside the tractor rear wheel, which enables tall plants and trees to be undercut or lifted without damage.

Adapted for customer requirements.
